ARTIFICIAL INTELLIGENCE
INTERNATIONAL MAIL ART PROJECT

“Artificial Intelligence”
International Mail Art Project

“If our existence continues, I think that our future will most probably depend on a partnership between human mind and machine mind.”
by Carl Sagan

The possibility of human-beings to create more intelligent creatures than themselves while trying to understand the universe and the nature is a matter of subject for most of the scientists. Hawking, as one of the most competent names in this field, expresses that if the artificial intelligence is not controlled, then it may bring an end to the humanity; likewise, the founder of the Microsoft Bill Gates mentions that he cannot understand people who do not worry about the development of the artificial intelligence so much as not to be controlled; and he states that it is highly required to feel anxious about the potential menace of the artificial intelligence. On the other hand, Elon Musk says that the best way to protect ourselves from the artificial intelligence is to transform into the artificial intelligence itself. Considering from an optimistic perspective, it is thought that people will be able to spend more time for funny things, art, literature; and the poverty and ailments will be completely gone and eternity will be obtained.

It seems inevitable that digital and material world will get married…

“Artificial Intelligence” mail-art project aims at raising an awareness on the subject by making the best or the worst thing that may ever happen to us the current agenda.

“Yapay Zeka”
Uluslararası Posta Sanatı Projesi

“Eğer varlığımız sürerse, geleceğimizin büyük ölçüde insan zekâsı ve makine zekâsı arasında bîr ortaklığa bağlı olacağını sanıyorum”.

Carl Sagan

İnsanın evreni ve doğayı anlama yolculuğunda kendisinden daha zeki varlıklar meydana getirme olasılığı birçok uzman için tartışma konusudur. Bu konuda en yetkin isimlerden Hawking; yapay zekanın kontrol edilmezse insanlığın sonunu da getirebileceğini ifade ederken Microsoft’un kurucusu Bill Gates, yapay zekanın kontrol edilemeyecek kadar büyümesinden endişe etmeyen insanları anlayamadığını belirterek yapay zekanın yarattığı tehditten kaygı duyulması gerektiğini, Elon Musk ise yapay zekadan korunmanın en iyi yolunun yapay zekâya dönüşmek olduğunu, söylemektedir. Olaya iyi tarafından bakıldığında, insanların daha eğlenceli işlere, sanata, edebiyata daha fazla vakit ayırabilecekleri, fakirliğin, hastalığın ortadan kalkacağı, ölümsüzlüğü yakalayabilecekleri düşünülmektedir.

Fiziksel ve dijital dünyanın evliliği kaçınılmaz görünmekte….

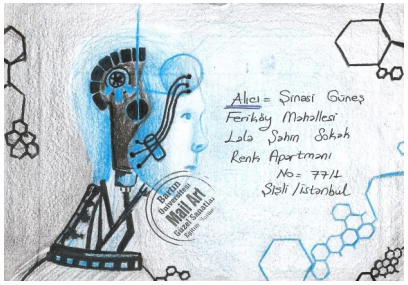

“Yapay Zeka” posta sanatı projesi başımıza gelebilecek en kötü veya en iyi şeyi gündeme getirerek bir duyarlılık oluşturma çabasını içermektedir.
